EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul J. Skwierawski on Monday, May 16, 2005.

The application has been amended as follows:

ABSTRACT

A combustion-type power tool capable of preventing a sub-stream of air-fuel mixture from passing through a gap between an electrode and an opposing electrode section, and yet capable of providing a desirable ignition without lowering maintenance efficiency of the tool. The opposing electrode section opposes the electrode of an ignition plug body. A head cap supports the opposing electrode section at a position closer to an axis of a fan than the electrode to the axis. The opposing electrode section protrudes from the head cap outward in the radial direction of the fan. The side of the head cap defining a combustion chamber has three parts. A first part surrounds the rotation axis of the fan. A second part supports the ignition plug body. A third part located in the radially outer side of the second section with respect to the axis.

The following is an examiner's statement of reasons for allowance: the limitation sets forth in claim 1, "an opposing electrode section 56 provided in the combustion chamber 11 and located closer to the head section 4 than the fan 13 to the head section, the opposing electrode

section 56 opposing to the electrode 16A for generating a spark there between; wherein the opposing electrode section 56 is supported by the head section 4 at a supporting position positioned closer to the axis 13a of the fan 13 than the electrode 16A to the axis 13a of the fan 13, and the opposing electrode section 56 protruding outwardly from the supporting position in a radial direction of the rotation axis" are not shown or taught by the prior art references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
